PROJECTS

Tic-Tac-Toe

Jan 2024

Designed and developed an engaging Tic-Tac-Toe game using js, providing turn-based gameplay, dynamic winner display, and a user-friendly 'Play Again' button for seamless replayability."

Rock-Paper-scissors

Dec 2023

Design a simple interface where users can input their choice (rock, paper, or scissors) and see the computer's choice as well as the outcome of the game. Implement the logic for determining the winner of each round based on the choices made by the user and the computer.

Currency Converter

Feb 2024

The Currency Converter project aims to develop a tool that allows users to convert between different currencies. It will fetch real-time exchange rate data from an API. Include error handling to deal with cases such as invalid input or failure to retrieve exchange rate data.
